

Case Study Part 2 Reflection

I have already included part one of this case study and I while doing part 2, I learned so much more. The best part of section 2 was being able to put everything together and finalize the overall case study. Being my first case completed case study, it helped me understand that knowing all information is great, but being able to put it all together is another story. Looking back from my time in my clinical SEL, every patient is unique in their own way, and because of this, the knowledge you obtain from their files and their story is important. The biggest challenge was exactly this, but this challenge gave me the ability to strive throughout my SEL's and coursework. Lastly, if you look at the first completed case study to my last, it gives you an opportunity to illustrate how I have grown as a person and an evidenced based learner.
