Food and Invoice Reflections

I wanted to include these projects because I worked on these projects throughout almost my entire SEL. Because I spent so much time and effort, I wanted to ensure that my results were seen by you because after I completed these projects, they were sent to the CEO to help Meals on Wheels. The most challenging aspect of these projects was finding time through helping each site, doing coursework and doing other projects. I am pleased with how they both turned out and after I completed this, there was a lot of change that happened at each site.  Because of this SEL and these projects, it has given me the experience I may need in future career paths to effectivity and efficiently do the job. All in all, I think the most gratifying thing from these projects was knowing how impactful they were not only for the organization but the clients were rely on them.
