

## Foodborne illness Reflections

I wanted to include this project because I think it had the most impact at all of the sites. I think most of my project had an impact but only the top officials at Meals on Wheels saw those, while with this project, I was able to present and talk to almost all site managers to inform them on food safety. The presentation was supposed to be around 15 minutes, but the managers had so many interesting questions, that the presentation lasted around 30-45 minutes. I think to date, this project is still shown or presented at Meals on Wheels because the CEO enjoyed the reaction. The most challenging part of the presentation was taking all the information that I need for the presentation and breaking it down into fun but also informative slides. I think looking back, I had a lot of fun, but I also learned a lot from the research I had to do. Overall, I think I would go back to Meals on Wheels and volunteer to create and give these presentations because it has so much impact.
